

# PARENT + TEACHER= EDUCATED CHILD

As STAKEHOLDERS of the Claiborne County School District, we all play a vital role in educating our children. We are definitely going to adhere to the ruling of our governor so the CCSD will be closed until April 17, but it doesn't mean learning has to cease.

We have prepared STUDENT LEARNING PACKS that will be issued to help remediate and advance the students of the Claiborne County School District. We would also like to provide one of the most helpful educational sites for the parents to assist in keeping their child or children Proficient or Advanced in assuring our district progresses. One of the most helpful websites for parents is [www.youtube.com](http://www.youtube.com).

For example, if your child is in 6<sup>th</sup>Grade Math and the Standard is 6.G.1 ( Finding the Area of Polygons): The number 6 represents the GRADE Level, the G represents the Geometry Strand and the last number 1 represents the 1<sup>st</sup> standard of that Strand. You would go to [www.youtube.com](http://www.youtube.com) and just type in that standard 6.G.1 and numerous videos explaining how to find the Area of a Polygon (Triangle, Quadrilateral) will be available. Check out this video!!

<https://www.youtube.com/watch?v=loXHBX5dboY> As you can see, this video explains in detail how to find the Area of a Triangle. This will work for any grade level and subject, just type in that standard number or the skill your child is working on. For example, if you have a child in the Third grade working on ELA (English and Language Arts) standard 3.RL.6 (Point of View) the following is a very helpful video and explains in detail as well.

We are committed as a TEAM to the education of our future: THE BOYS AND GIRLS OF THE CLAIBORNE COUNTY SCHOOL DISTRICT!!!
